ACT LEGISLATIVE ASSEMBLY

RECEPTION ROOM, LONDON CIRCUIT, CANBERRA ACT 2601

BACKGROUND

'Driving Change' is a national study that aims to record the drug and alcohol intake and place of last drinks, of patients presenting to emergency departments at eight hospitals across Australia. Funded by the National Health and Medical Research Council (NHMRC), the study is based on the 'Cardiff Model', which was first trialled in the United Kingdom from 2002 to 2007.

The 'Cardiff Model' contributed to substantial reductions in assault and injury in the city of Cardiff, and has now been introduced in more than 80 per cent of the United Kingdom's emergency departments.
